

QUESTIONS ABOUT HOW TO MANAGE YOUR HILL COUNTRY PROPERTY?

The Land Management Assistance Program (LMAP) Team
Highland Lakes Chapter
Texas Master Naturalists

is available to visit your property, primarily in Blanco, Burnet, Lampasas, and Llano Counties:

- To help you identify trees, shrubs, wildflowers, and grasses on your land, including those defined as "invasive" under www.texasinvasives.org;
- To discuss with you your goals, plans, and concerns for the land;
- To help you recognize potential land use problems;
- To discuss "Firewise" principles;
- To talk with you about good land management practices; and
- To provide you with the names of government agencies and other organizations that are available to assist landowners.

Site visits last from 2-1/2 - 3 hours. After a site visit, the LMAP Team provides a written assessment to the landowner, along with a list of plants identified on the property.

The LMAP Team seeks to serve those small landowners having 100 acres or less.

For further information, or to schedule a free site visit, email us at amelhuff77@gmail.com.

The Texas Master Naturalist program is sponsored by the
Texas AgriLife Extension and the Texas Parks & Wildlife
Department.
